Let's Start!

What things are selling well around here?

Learning Outcome:

Identify key information about people's jobs and places of work in spoken or written contexts.

Build the IT system prototype, starting from the analysis of the functional characteristics of the system regarding user-friendliness, functionality and user experience, supported in software applied following design protocols.

Can Do Statements:

- I can talk about sales trend analysis.
- I can give detailed information related to sales trend analysis.
- I can understand facts related to sales trend analysis.

Ask your partner:

- How can you know what customers are buying in large amounts? Is that relevant? Explain.
- Are there any online tools to know what people are searching for on the internet?

Let's Explore!

Let's use trend analysis to reach* new clients!

*To "reach" someone is to get closer or approach that person.

Instructions: Read the text below.

Mike: Well Sally, we need to look for a way to guarantee that we can sell our products abroad. But I don't know how.

Sally: I could suggest we use some sales trend analysis tools.

Mike: Do you know how they work?

Sally: Yes! We can use them to know what products we can sell well at a specific location in a particular period of time. There are many tools to study sales data flow, best locations for stores, and what particular equipment is necessary.

Mike: That's perfect! How do we do that?

Sally: We can use online tools to do a sales trend analysis. For this, we can use some keywords like the name of a particular product in order to get all the information about how this product sells. And then, we can find information about what people look for on search engines, social media and many other platforms.

Mike: Are there any other things we can do?

Sally: Yes, there are more tools available depending on the website and the type of search we do. We can select more or fewer criteria to obtain the best results.

Mike: Okay, let's see. If I want to look for mobile devices, how do I do that?

Sally: Let me show you. We enter the website; then, we put the keyword. Do you want to search worldwide?

Mike: The more countries we see, the better. Don't you think?

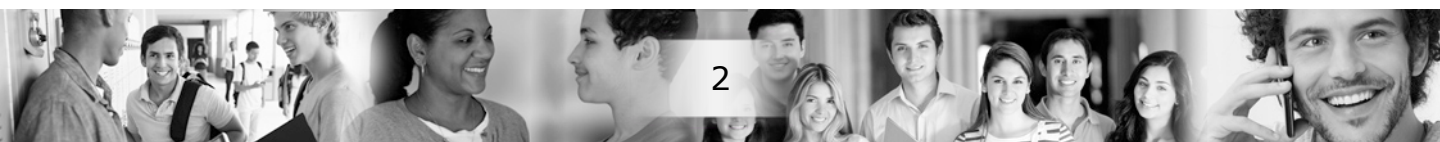

Sally: That depends. If we select fewer countries, we can think about a strategy that we can apply to that particular market. With more countries the results might not be as detailed as they could be with fewer options.

Mike: Interesting. So, let's try with our neighboring countries.

Sally: Good! It says that people around our country are looking for mobile apps. And there are more options, like cellphone accessories, repairs, and so on.

Mike: So, with that information, can we say that customers are very interested in mobile phones and applications?

Sally: That's right!

**Let's Practice!**

Deciding the best way to analyze some important information!

Instructions: Find the missing words for each sentence.

1. We want to invest a _ _ _ _ . But before we try selling our products outside our country, we have to do some research.
2. We use an important instrument or t _ _ _ to do our sales analysis.
3. Please type the k _ _ _ _ _ that will through the best results.
4. We need to search it w _ _ _ _ _ . We have to get as much information from every country as possible.
5. We need to search the sales trend of our n _ _ _ _ _ countries. This will help us know if we can trade easily with them.

**Let's Practice!**

More information about sales trends helps you make fewer mistakes.

Instructions: Write the sentences form the box to correctly complete the sentences.

to find more / We can select more or fewer /
get more information / select fewer countries

1. We can use some keywords like the name of a particular product in order to _____ about how this product sells.
2. We can use online tools to do a sales trend analysis. For this, you can use some keywords _____ information about what people look for on search engines, social media and many other platforms.
3. We can do other things and check more tools available depending on the website and the type of search we do. _____ criteria to obtain the best results.
4. For example, if we _____, we can think of a strategy that we can apply to that particular market. With more countries the results might not be as detailed as they could with fewer options.

Extension Activity

Let's compare some online tools to identify trends!

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Look for information about online tools to analyze trends.
- Choose and summarize information about some of the most common online tools to analyze trends (At least four tools).
- Create a comparative chart in a poster explaining the differences among some of the online tools to analyze trends.
- Present your chart to your class and explain it.

Self-Assessment

Yes No

- I look for additional information about Online Tools to Analyze Trends. ☐ ☐
- I make a summary with useful information about online tools to analyze trends. ☐ ☐
- I invent a meaningful material to contextualize and explain some of the online tools to analyze trends and I share and explain my poster to the class. ☐ ☐

Target Words

- **abroad** (noun) overseas or in a foreign country
e.g. Well Sally, we need to look for a way to guarantee that our products will sell abroad.
- **neighboring** (adjective): surrounding, bordering or close
e.g. So, let's try with our neighboring countries.
- **keyword** (noun): a word that allows you to search information on a particular topic
e.g. We can use some keywords, like the name of a particular product.
- **search engine** (noun): a website that you can use to search for information online
e.g. We can find information about what people look for on search engines, social media and many other platforms.
- **tool** (noun): instrument or utensil
e.g. I could suggest we use some sales trend analysis tools.
- **worldwide** (adverb): global or related to the whole planet
e.g. Do you want to search worldwide?

Learning Points

Quantifiers (More and Fewer).

You can use **quantifiers** to talk about approximate amounts or to compare the amounts of two or more nouns.

You can use the **quantifier (more)** to make comparisons between nouns and to talk about an increasing and approximate quantity. Remember, the quantifier goes before the noun or adjective.

Examples:

*There are **more** responsibilities involved in the fiscal flow.*

*With different flows, the logistics processes are **more** organized.*

On the other hand, the **quantifier (fewer)** is used to talk about small quantities. It is used exclusively with countable nouns.

Examples:

*The **fewer** options you use, the better the sales trend analysis is going to be.*

*With **fewer** keywords you will find more results.*

Examples

- *Yes, there are more tools available depending on the website and the type of search we do.*
- *We can select more or fewer criteria to obtain the best results.*

Online Tools to Analyze Trends.

In order to have an idea of market changes and customer preferences, you can use different tools to keep up to date about what clients prefer to buy and to fulfill their needs.

When you need to make business decisions, it's always important to be informed to prevent making mistakes. Nowadays, you can use the internet and some powerful tools to analyze and determine market trends.

You just need to find a reliable search engine with some keywords, for example PCs, mobile devices, etc. Then, it will show you how popular that keyword is.

Some trend searchers allow you to explore them in social networks, search engines, blogs or even online sales sites. You can also benefit from world trends graphics, especially if you plan to do business overseas.

Examples

- *We can use online tools to do a sales trend analysis.*
- *We can use some keywords like the name of a particular product in order to get all the information about how this product sells.*
- *We can find information about what people look for on search engines, social media and many other platforms.*
