Sharon: Of course. They're a bit old-fashioned if you ask me.

Charlotte: So, what do you suggest I do?

Sharon: We could make your brochures reach more people by transferring the information to a digital format. Maybe we can make a long-lasting impression with a nice website.

Charlotte: I don't know how to do that. Can you help me?

Sharon: Sure. Sometimes the hardest part is moving information from a physical format to a digital one. However, with the right tools, you'll see it's the easiest thing you can do.

Charlotte: What do I need, then?

Sharon: Let's use your laptop. Here we can install this great web authoring and photo editing program. As you can see it allows us to use different layout tools, animations, banners, sounds and even videos.

Charlotte: Well, that's very eye-opening. I thought that using those tools was one of the toughest parts of moving to a digital format.

Sharon: It can be. However, one of the advantages of creating web content is that you can have a far-reaching audience, compared to that of printed brochures. Also, developing these tools is less time-consuming than printing anything.

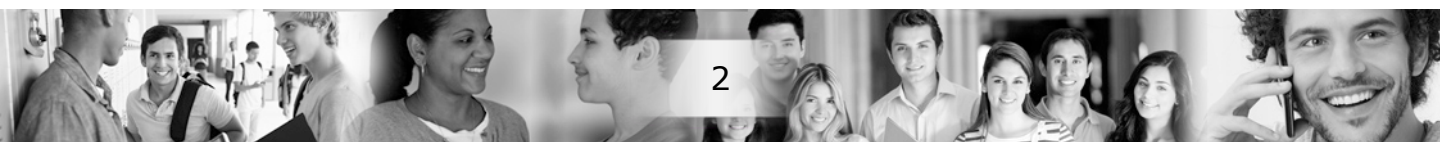

Charlotte: Can we transfer the brochure into a digital format?

Sharon: Sure! We need to scan it and make it even better. Though the colors might not match, and it might look a little blurry, but you know, that's one of the disadvantages of converting from a printed format to a digital one.

Charlotte: Can we fix that?

Sharon: Definitely, we'll make the prettiest animation using all the tools in this program. And we can post it in the most popular and coolest websites to attract more customers.

Charlotte: Sure, let's do it!

Superlatives (Short Adjectives).

You can use **superlatives** to talk about a noun that has a highly developed quality.

In order to use **superlatives** with **short adjectives**, you need to use the definite article **the**, and the adjective with the **-est** suffix.

Remember, **short adjectives** have only one or two syllables.

Examples:

*The **fastest** design programs are very expensive.*

*Digital tools offer the **simplest** approach to information design.*

Some two-syllable adjectives can also take **the most** to form the **superlative**.

*The **simplest** systems offer great reliability.*

*The **most simple** systems offer great reliability.*

There are exceptions to create **superlatives** in some common adjectives.

Examples:

*The **best** way to spread information is online.*

Examples

- *Sometimes the hardest part is moving from a physical format to a digital one.*

Learning Points

Compound Adjectives.

Compound adjectives usually put two simple **adjectives** together to form a new word with a different meaning.

In order to use **compound adjectives**, you need two or more of them and you need to use hyphens (-) in order to avoid confusions, because without the **hyphens**, each **adjective** looks as a single word.

Examples:

*Digital technologies are very **well-known** nowadays.*
