Let's Start!

Is this really art?

Learning Outcome:

Identify key information about people's jobs and places of work in spoken or written contexts.
Identify and recognize information related to concepts about graphic design related to IT.

Ask your partner:

- Do you think there can be a relationship between art and technology? Why?
- How is it possible to use technology to create works of art?

Can Do Statements:

- I can talk about the relationship between computer technology and media.
- I can explain why the art can be linked to technology.
- I can understand how the development of personal computers help artistic expressions.

Let's Explore!

The digital effects on this movie are appalling*.

*"Appalling" means very bad or horrible.

Instructions: Read the text below.

Paul: I can't believe what they did to this movie. The new version looks so fake.

Sally: Why do you say that?

Paul: It's the special effects, they made them using computers, but they look terrible.

Sally: You know that technology is used constantly in the media. I can tell you that doing all that work is not easy. In fact, I think it's an art.

Paul: How can that be considered art?

Sally: Because it implies the use of creativity and imagination. The images or media that result from this process are unique and an expression of the artist.

Paul: This movie it's the plainest form of art, if you ask me.

Sally: Maybe. As in any piece of art there are some people who think it's the most impressive or atrocious piece. It's all in your perception. But I agree that they did a very bad job with this movie. Using technology can't compensate for a lack of talent.

Paul: You're right. I've seen some of the most amazing effects in movies, and they were created using computers. I've also seen some beautiful images that have been enhanced with digital tools, so it's not that I think everything is bad.

Sally: Definitely. I think that art can be linked to technology; it's basically a tool that artists can use, as brushes, paint or canvases. It's undeniable that technology has become an essential part in the artistic process, because it allows artists to use newer features that didn't exist before.

Paul: You're right. I saw one of the most incredible works of art in an interactive museum. Over there, people can touch the pieces, they can take photos, the works are like chameleons and change all the time. It was the most jaw-dropping thing I've ever seen.

**Let's Practice!**

Computer technology is one of the most important tools for art.

Instructions: Circle the correct option to complete the sentences.

1. The computer technology (*does/can*) enhance the quality of movies.
2. Technology is used constantly in the media. Some people (*have to/may*) even consider digital works as art.
3. I think that using technology (*can't/must*) compensate the lack of talent.
4. Technology is a tool that artists (*can/should*) use just as brushes, paint, or canvases.

**Let's Practice!**

Tools for Creators.

Instructions: Read the sentences. Select the correct answer.

1. This movie it's _____ elaborated form of art, if you ask me.
a. the best
b. the less
c. the least
d. the more
2. As in any piece of art there are some people who think it's the most _____ or atrocious piece.
a. impression
b. impressive
c. imperative
d. improved
3. I've seen some of _____ amazing effects in movies, and they were created using computers.
a. the more
b. the most
c. the worse
d. the moreover
5. I saw one of the most _____ works of art in an interactive museum.
a. increase
b. incredible
c. incredibly
d. increasingly
6. It's undeniable that technology has become one of the most _____ parts in the artistic processes.
a. essence
b. essences
c. essential
d. essentials

Extension Activity

Mind Mapping About the Relationship Between Technology and Art.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Look for more information about the relationship between computer technology and art.
- Identify 5 key aspects about the topic and summarize them.
- Create a mind map to describe your ideas.
- Share your findings in class.

Self-Assessment

Yes **No**

- I read about the relationship between computer technology and art.
- I identify 5 key aspects about the topics and summarize them.
- I create a mind map to describe my ideas.
- I share my findings in class.

☐	☐
☐	☐
☐	☐
☐	☐

Target Words

- **atrocious** (adjective): terrible, awful or very bad
e.g. As in any piece of art there are some people who think it's the most impressive or atrocious piece.
- **lack** (noun): the absence or deficiency of something
e.g. Using technology can't compensate for a lack of talent.
- **enhance** (verb): to improve or rearrange in a good way
e.g. I've also seen some beautiful images that have been enhanced with digital tools.
- **fake** (adjective): false, unauthentic or unoriginal
e.g. The new version looks so fake.
- **imply** (verb): to mean, suggest or involve something
e.g. Because it implies the use of creativity and imagination.
- **plain** (adjective): unadorned, simple or with no taste
e.g. In this movie it's the plainest form of art, if you ask me.

Learning Points

Superlatives (Long Adjectives).

You use the superlative to show the highest possible degree of an adjective. However, the rule that we have to follow to form it varies depending on **the length of the adjective**.

English has short and **long adjectives**, we can identify them by the number of syllables they have. In this case, an adjective that has no more than two syllables is a short one and those that have more than two, are considered long.

As the superlative represents, in this case, the highest level of a long adjective, the rule that you have to follow to form it is the following:

the most/the least + adjective (base form)

Examples:

***The most challenging** part of designing is to decide the format.
Even **the most advanced** program can't replicate classic art.
I think that's **the least elaborated** piece of art, I've ever seen.*

Look at the following chart to identify some long adjectives:

Long Adjectives	
Interesting	Dangerous
Difficult	Boring
Beautiful	Important
Relaxing	Expensive
Authentic	Enormous

Examples

- *As in any piece of art there are some people who think it's the most impressive or atrocious piece.*
- *I've seen some of the most amazing effects in movies, and they were created using computers.*

Learning Points

Digital Art.

Thanks to powerful designing tools, content creators are developing very impressive works.

With the development of technology, many programs started to appear, among them image editing software. As computers became more advanced, these programs became more powerful and allowed creators to do more than just edit photos.

There are many evidences of the potential of these programs, with the development of 3D animation or even special effects in films, the work of these artists has become something that can be seen everywhere.

However, experts still wonder if this work can be considered as art. Some artists argue that nothing can compare to the feeling of canvas, for painters. Still, digital art has become increasingly impressive, especially because it can allow the work of art to interact with its audience in ways that have never been explored before.
