Let's Start!

I can see all the pixels!

Learning Outcome:

Identify key information about people's jobs and places of work in spoken or written contexts.
Identify and recognize information related to concepts about graphic design related to IT.

Can Do Statements:

- I can give detailed information about graphic formats.
- I can talk about JPG, PCX and TIFF.
- I can explain how JPG, PCX and TIFF are used.

Ask your partner:

- What graphics formats do you know? What are their characteristics?
- Is image quality important to you? Why? Why not?

Let's Explore!

A photographer doesn't know what graphics format is the most appropriate for him.

Instructions: Read the text below.

Tom: So, Sean, have you decided what format you're going to use yet?

Sean: Yes, I read about the different formats that I can use and I found that they vary in the use of colors and pixels. I found JPG, PCX and TIFF. They were described in detail on this page a friend recommended me. It has great references.

Tom: I don't know anything about those. I guess they're the least common ones, right?

Sean: Yes. PCX was used in the past, but it isn't the most popular format anymore. It was replaced by the TIFF format which is more modern, but it also has more compatibility issues.

Tom: Well, which one of them is the most common one?

Sean: None of them. Although PCX was used in the early days of computing, it is not so common anymore. TIFF, which stands for Tagged Image File Format, is common among graphic artists and in publishing. This format is still supported by many graphic applications, especially for design layouts or even word-processing.

Tom: So, are you going to use it?

Sean: I don't think so, I think that JPG is the best format I can use for my photos.

Tom: That's great! I know JPG. It's one of the most common graphic formats. Does it have any downsides?

Sean: I read that JPG stands for Joint Photographic Experts Group. It's more versatile than the other formats, but it's lossy. This means that it tends to degrade over time due to compression. Lossless versions were developed, but they weren't widely adopted by users.

Tom: Almost all digital cameras use that format and the files don't take much space. What are you going to do, then?

Sean: The best I can do is to use a lossless format. To publish online, I'll use JPG, which is the most convenient and compatible.

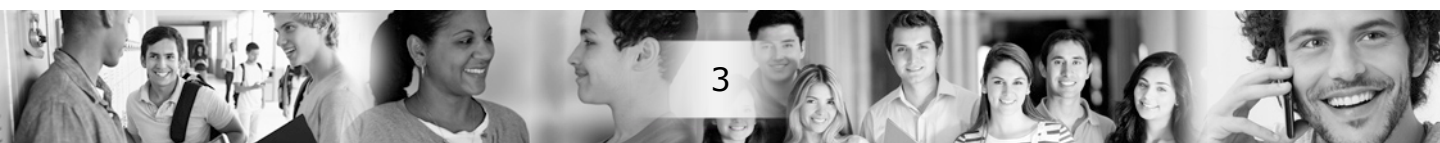

Let's Practice!

Let me tell you which graphic format is the best for you!

Instructions: Classify the sentences by writing the number of the sentence in the correct category.

1. PCX format isn't the most popular format anymore, but it was replaced by a more modern format called TIFF.
2. TIFF graphic format was better than PCX format, but nowadays JPG is better than those old formats.
3. I know JPG is one of the most common graphic formats and it is more appropriate for the storage of pictures.
4. Digital cameras use a format that doesn't take much space, JPG stores the most important pictures.
5. You can publish with JPG format online because is more convenient and compatible than other formats.
6. The TIFF format is more modern than PCX.

Comparatives	Superlatives

Let's Practice!

I think I can tell you some benefits of the different graphic formats.

Instructions: Read the sentences. Write the missing word(s) in the blank. Use: were designed and modified to improve the quality of, PCX was the first graphic format used in, format was invented to replace the PCX format, also known as JPG was designed to be more versatile.

1. JPG, PCX and TIFF graphic formats _____ to help graphic designers in their profession.
 - a. were created
 - b. was presented
 - c. were played
 - d. was shown
2. PCX graphic format _____ in the past, but it isn't the most popular format anymore.
 - a. were used
 - b. was used
 - c. were written
 - d. was scripted
3. TIFF, which stands for Tagged Image File Format, _____ to replace PCX format, but it has more compatibility issues.
 - a. were operated
 - b. were erased
 - c. was implemented
 - d. was cooked
4. The Joint Photographic Experts Group also known as JPG _____ to be more versatile than the other formats.
 - a. was design
 - b. were designed
 - c. were design
 - d. was designed
5. JPG, PCX and TIFF formats vary in the use of colors and pixels; these formats _____ and modified to improve the quality of pictures and files.
 - a. was designed
 - b. were designed
 - c. were design
 - d. was design

Extension Activity

I can show you the different graphic formats!

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Look for additional information about graphic formats.
- Summarize the information about graphic formats.
- Create a comparative chart or other kind of chart explaining the differences among the different graphic formats.
- Show and explain your poster to the class.

Self-Assessment

Yes

No

- I search information about graphic formats. ☐ ☐
- I make a summary about graphic formats. ☐ ☐
- I create an original comparative material to explain the topic about graphic formats. ☐ ☐
- I share and explain relevant information about the topic in class. ☐ ☐

Target Words

- **lossless** (adjective): in computing, that is not compressed or doesn't lose its quality
e.g. Lossless versions were developed, but they weren't widely adopted by users.
- **word-processing** (adjective): that is able to process or format text
e.g. It's still supported by many graphic applications, especially to design layouts or even word-processing.
- **widely** (adverb): broadly, extensively or comprehensively
e.g. Lossless versions were developed, but they weren't widely adopted by users.
- **issue** (noun): a problem or difficulty
e.g. It was replaced by the TIFF format which is more modern, but it also has more compatibility issues.
- **lossy** (adjective): that loses quality, especially in computing and due to compression
e.g. It's more versatile than the other formats, but it's lossy.
- **downside** (noun): disadvantage, weakness or shortcoming
e.g. I know JPG. It's one of the most common graphic formats. Does it have any downsides?

Learning Points

Comparatives vs. Superlatives.

You can use **adjectives** to make **comparisons** or to describe something with a **highly developed quality**.

Short adjectives:

For both the **comparative** and the **superlative form** in short adjectives you keep the adjective in its original form with little changes at the end. In the case of the comparative form, you need to add **er** at the end to make the comparative form. To make the superlative form, you add the article **the** before the adjective and **-est** at the end.

There are a few rules, however, that you have to keep in mind. Take a look at the following chart to learn them in more detail:

CHART 1

Examples:

*Designers use **heavier** formats than regular consumers.*

***The greatest** graphic formats offer a lot of details and accuracy.*

Long adjectives:

To make the **comparative** form of long adjectives (adjectives with two or more syllables) all you have to do is add the word **more**:

*Some graphic formats are **more flexible** than others.*

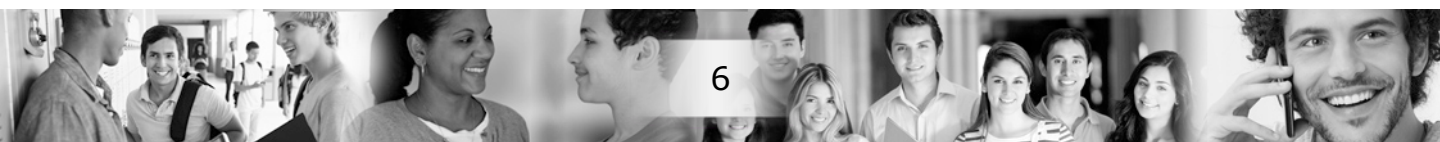

For the **superlative** form, you need to use the article **the** and the word **most** before the adjective:

***The most** useful formats are quite easy to use.*

Remember that adjectives ending with **-ing** or **-ed** follow the same rules long adjectives do in both their comparative and superlative form:

*Learning how to use these tools is **more boring than** I expected.*

***The most** advanced editing tools require a lot of resources.*

Learning Points

CHART 1

SUPERLATIVE FORM – SHORT ADJECTIVES		
Type of short adjective	Spelling rules	Examples
One syllable	The + adjective + est	slow → the slowest fast → the fastest tall → the tallest
One or two syllables ending in -e	The + adjective + st	large → the largest nice → the nicest gentle → the gentlest
Some two-syllable adjectives ending in -y	The + adjective -y → iest	hungry → the hungriest happy → the happiest funny → the funniest heavy → the heaviest
Ending in vowel + consonant	The + adjective + double the consonant + est	fat → the fattest big → the biggest fit → the fittest

Examples

- *PCX was used in the past, but it isn't the most popular format anymore.*
- *The best I can do is to use a lossless format. To publish online, I'll use JPG, which is the most convenient and compatible.*

Learning Points

Simple Past (Verb to Be + Participles).

You can use verb **to be** in **past** and past participles to talk about a noun or object and an action that affected it.

Remember that verb **to be** has two forms in past, which are **was** and **were**. They are used like this:

CHART 1

In this kind of sentences, you need to use a noun or an object at the beginning, then verb to be in past and the past participle of the main verb.

Examples:

*This format **was adapted** to web applications.*

*Graphic formats **were simplified** to reach regular users.*

Personal Pronoun	To be Past Form
I	was
he	was
she	was
it	was
you	were
we	were
they	were

Examples

- *It was replaced by the TIFF format which is more modern.*
- *Lossless versions were developed, but they weren't widely adopted by users.*
